Customize the Campaigns Style and Color

Customize the look and feel of the page background color or add an image and set the color scheme used for campaign buttons, headers, navigations indicators, and more.

Locate style and color options

1. Go to **Admin Navigation**, select **Design** > **Style & Color**.

Background

Add either a color or an image to the visitor facing campaign pages.

- Click the dropdown arrow to the right of the color picker to add color.
- Upload an image to add a background image.

> **Note:** The recommended image size is 1600x900 pixels with a max file size of 500 KB. The use of a background image can slow down the initial page load.

Main and secondary colors

- Click the dropdown arrow to the right of the color pickers.
- Select the desired colors.
- Click **Choose**.
- Preview selection.
- When you've finished, click **Save**.

Main color

Set the background and text color used for headers, navigation indicators, and general buttons.

Secondary color

Set the background and text color used on call to action buttons, in email communications, and for item numbers.

> **Note:** The **Manage Items**, **New Package**, and **New Item** buttons located on the **Items** page are only viewable by admins and not editable.
