

Safely Share your Site Links

Last Modified on 04/27/2022 1:08 am EDT

Shareable links direct users to areas of your campaign site to engage in the offerings without the association of a specific user. When promoting your campaign site on social media, in communications, or when promoting to a friend, use the shareable links available within your campaign site to safely share.

Note: If a link is shared when creating or editing a section, page, or communication, that includes a personal link, the system automatically updates the link and notify you of the correction.

Shareable links within your campaign

Within the campaign site, we offer recommended shareable links. The following areas include:

Website URL

Use this link provided in the Site container of your campaign dashboard when promoting your campaign website URL to supporters.
