What is the URL slug?

When you create your custom page, the slug will use the name of the page title. The URL slug is part of the link that identifies this page on your campaign site. This will be part of the link you will use to share your page with supporters. For example, if your slug is /sponsors, then the full shareable link would end with ".../page/sponsors".

Warning: Do not change the slug after shared with the supporters. Changing the slug after sharing will take the supporter to a broken page.

URL slug formatting guidelines

- We recommend your slug be all lower case.
- No special characters are allowed.
- One dash is allowed between words.
- Character limit 40.
