Include a Video or Live Stream on your Home Page

Last Modified on 04/29/2022 12:08 pm EDT

Many of our charity partners are incorporating a live stream of their fundraisers or a pre-recorded video. Videos or a link to a live stream can be added to a custom section, custom page, or presentation page. Visit Custom Section and Page Templates for various layout options.

Include a recorded video

Video links can be added to a home page custom section.

Add a YouTube video

1. From the **Admin Navigation**, click **Pages** > **Home Page**.
2. Click **+ New Section.**
   - Add a **Name** for the section.
   - Click the **YouTube** icon.YouTube settings to allow embedding.

Embed a non-YouTube video

Any video service that provides an iFrame embed code can be easily embedded within a GiveSmart site's content section.

1. From the **Admin Navigation**, click **Pages** > **Home Page**.
2. Click **+ New Section.**
   - Add a **Name** for the section.
   - Select the source code (**< >**) option.

     Visit Video and Live Stream Embedding FAQs for additional resources.

     Additional streaming tips:
     - Once embedded, test for responsiveness to make sure the live feed looks good on a mobile, tablet, and desktop device.
     - You will either need DSL, Cable, or Fiber high-speed internet. For best results, we recommend your streaming upload bandwidth be at least 1.5x the combined bit rate of all your streamed programs (when streaming in SD or above).
